Feed advice:

The required amount of Pavo Triple P depends on, for example, roughage quality, outdoor grazing and training. Divide Pavo Triple P over several feedings per day and never give more than 2 kilos of concentrate per meal.

- Average advice in medium-heavy work: 450 gram per 100 kg bodyweight per day
- Maximum advice in heavy work: 600 gram per 100 kg bodyweight per day
- The required amount depends on grazing and work

Feed scoop content One full Pavo feed scoop Pavo Triple P contains approximately 0.9 kg.

TIP For maximum effect, you can also temporarily add Pavo Triple P to your ration in the days before an important competition or days with an increased training load.
