

## Pavo 18Plus Sensitive - 86398

To keep your sensitive senior fit

Complementary feed for horses

### Analytical Constituents:

|               |        |            |        |            |        |      |            |
|---------------|--------|------------|--------|------------|--------|------|------------|
| Crude protein | 22 %   | Calcium    | 1 %    | Lysine     | 11.5 g | EWpa | 0.84 EWpa  |
| Crude fat     | 7.9 %  | Phosphorus | 0.43 % | Methionine | 3.2 g  | DE   | 10.5 MJ/kg |
| Crude fibre   | 17.4 % | Sodium     | 0.78 % | Threonine  | 8.5 g  |      |            |
| Crude ash     | 10.8 % | Potassium  | 1.8 %  | Omega-3    | 19 g   |      |            |
| Sugar         | 5.9 %  | Magnesium  | 0.8 %  | Omega-6    | 23 g   |      |            |
| Starch        | 4 %    |            |        |            |        |      |            |

### Additives per kg:

|                                  |                                  |           |                   |                                                                                                       |         |
|----------------------------------|----------------------------------|-----------|-------------------|-------------------------------------------------------------------------------------------------------|---------|
| Vitamin A (3a672a)               |                                  | 16,500 IE | Copper (3b407)    | Chelate of protein hydrolysate                                                                        | 12 mg   |
| Vitamin D3 (3a671)               |                                  | 3,000 IE  | Copper (3b409)    | Dicopper chloride trihydroxide                                                                        | 69 mg   |
| Vitamin E (3a700i)               | all-rac-alpha-Tocopheryl acetate | 356 IE    | Iron (3b107)      | Chelate of protein hydrolysate                                                                        | 30 mg   |
| Vitamin E (3a700ii)              | RRR-alpha-Tocopheryl acetate     | 87 mg     | Zinc (3b612)      | Chelate of protein hydrolysate                                                                        | 49 mg   |
| Vitamin K3 (3a711)               |                                  | 5 mg      | Zinc (3b609)      | Zinc chloride hydroxide monohydrate                                                                   | 276 mg  |
| Vitamin B1 (3a821)               |                                  | 47 mg     | Manganese (3b505) | Chelate of protein hydrolysate                                                                        | 31 mg   |
| Vitamin B2 (3a825ii)             |                                  | 19 mg     | Manganese (3b507) | Dimanganese chloride trihydroxide                                                                     | 175 mg  |
| Vitamin B6 (3a831)               |                                  | 13 mg     | Selenium (3b801)  | Sodium selenite                                                                                       | 0.75 mg |
| Vitamin C (3a312)                |                                  | 250 mg    | Selenium (3b811)  | Organic form of Selenium produced by Saccharomyces cerevisiae NCYC R397 (Selenised yeast inactivated) | 0.25 mg |
| Pantothenic acid (3a841)         |                                  | 27 mg     | Iodine (3b202)    | Calcium iodate, anhydrous                                                                             | 1.25 mg |
| Folic acid (Vitamin B11) (3a316) |                                  | 10 mg     |                   |                                                                                                       |         |
| Vitamin B12 (Vitamine B12)       |                                  | 75 mcg    |                   |                                                                                                       |         |
| Niacinamide (3a315)              |                                  | 38 mg     |                   |                                                                                                       |         |
| D-Biotin (3a880)                 |                                  | 653 mcg   |                   |                                                                                                       |         |

**Composition:** Alfalfa / Soya bean meal (toasted, GMO) / Soybean flakes nonGMO / Sunflower seed meal / Dried apple / Hay (flakes) / Rice bran / Beet pulp (<8% sugar) / Linseedoli / Linseed expeller / Timothy / Soya (bean) hulls (GMO) / Sodium chloride (salt) / Yeast product (TruEquine™) / Magnesium oxide / Carrot flakes / Sunflower seeds / Pea flackes / Crude vegetable oil (soya beans GMO) / Calcium carbonate / Products from the processing of Rosmarinus officinalis and Curcuma longa

**Storage advice:** Store in a cool, dry and dark place. Reclose after usage

### Feed advice:

#### Feed recommendation per day:

330 grams per 100 kg body weight

- Pony (300 kg): 1 kg
- Horse (600 kg): 2 kg

### Content per feed scoop

1 full scoop Pavo 18Plus Sensitive contains approx. 1,1 kg

### Instructions

Pavo 18Plus Sensitive can be fed dry (muesli) and soaked (mash).

Mix 1 part Pavo 18Plus Sensitive with 1 ½ parts of (warm) water . Let it soak for 10 minutes in warm water and 20 minutes in cold water.

# 15 kg
